We are also pleased to have the continued support of the capital markets, as demonstrated by our follow-on issuance of unsecured notes during the quarter at an attractive price and our closing of a new revolving credit facility yesterday at an attractive rate."

PORTFOLIO AND INVESTMENT ACTIVITY

As of December 31, 2017, our investment portfolio consisted of debt and equity positions in 96 portfolio companies with a total fair value of approximately \$1.51 billion. Debt positions represented approximately 95% of the portfolio at fair value, the majority of which were senior secured debt. Equity positions, including equity interests in portfolios of debt and lease assets, represented approximately 5%.

As of December 31, 2017, the weighted average annual effective yield of our debt portfolio was approximately 11.0%.⁽¹⁾ As of December 31, 2017, approximately 89% of our debt portfolio at fair value had floating interest rates. As of December 31, 2017, we had one debt investment on non-accrual status, representing zero percent of the portfolio at fair value.

During the three months ended December 31, 2017, we invested approximately \$213.0 million, primarily in thirteen investments, comprised of ten new and three existing portfolio companies. The investments were comprised of approximately \$171.4 million in senior secured loans and \$37.9 million in senior secured notes. The remaining \$3.7 million was comprised of equity investments, including \$3.5 million of additional equity interests in portfolios

of debt and lease assets as well as warrants received in connection with a new debt investment. Additionally, we received proceeds from sales and repayments of investment principal of approximately \$221.6 million. We expect to continue to invest in senior secured loans, bonds and subordinated debt, as well as select equity investments, to obtain a high level of current income and create the potential for appreciation, with an emphasis on principal protection.

As of December 31, 2017, total assets were \$1,629.4 million, net assets applicable to common shareholders were \$870.7 million and net asset value per share was \$14.80, as compared to \$1,642.1 million, \$877.4 million, and \$14.92 per share, respectively, as of September 30, 2017 and \$1,387.6 million, \$790.9 million, and \$14.91 per share, respectively, as of December 31, 2016.

CONSOLIDATED RESULTS OF OPERATIONS

Total investment income for the three months ended December 31, 2017 was approximately \$47.1 million, or \$0.80 per share, including \$0.09 per share from prepayment premiums and related accelerated original issue discount amortization, \$0.04 per share from recurring original issue discount amortization and \$0.02 per share from recurring income paid in kind. This reflects our policy of recording interest income, adjusted for amortization of premiums and discounts, on an accrual basis. Origination, structuring, closing, commitment, and similar upfront fees received in connection with the outlay of capital are generally amortized into interest income over the life of the respective debt investment.

Total operating expenses for the three months ended December 31, 2017 were approximately \$17.2 million, or \$0.29 per share, including interest and other debt expenses of \$9.0 million, or \$0.15 per share. We also incurred incentive compensation from net investment income of \$6.0 million, or \$0.10 per share. Excluding incentive compensation, interest and other debt expenses, annualized fourth quarter expenses were 3.7% of average net assets.

Net investment income after excise taxes for the three months ended December 31, 2017 was approximately \$29.9 million, or \$0.51 per share, before incentive compensation. Net investment income after excise taxes and incentive compensation was \$23.9 million, or \$0.41 per share.

Net realized and unrealized losses for the three months ended December 31, 2017 of \$10.3 million, or \$0.18 per share, were comprised primarily of markdowns of \$2.8 million on GreenBiologics, \$2.3 million on Real Mex, and \$2.3 million on the sale of our Contextmedia loan. Realized losses of \$9.1 million consisted primarily of \$7.1 million of Globecomm, which was triggered by a recapitalization. Globecomm was previously written down and is still held by the Company.

Net increase in net assets applicable to common shareholders resulting from operations for the three months ended December 31, 2017 was \$13.6 million, or \$0.23 per share.

LIQUIDITY AND CAPITAL RESOURCES

As of December 31, 2017, available liquidity was approximately \$371.6 million, comprised of approximately \$301.0 million in available capacity under our leverage program and \$86.6 million in cash and cash equivalents, less approximately \$16.0 million in net outstanding settlements.
